SUMMARY

Product designer with five years across design and frontend development. Designed a no-code website builder end to end — the editor, its widget library and the settings system behind every component — plus the 1,000+ blocks and 100+ templates built on it. Promoted from the entry title to department lead at two companies. Designs in Figma and builds in React, WordPress and Elementor, so the work arrives implementable.

EXPERIENCE

Lead Designer

Nov 2025 – May 2026

TavCorp · Lagos

Joined as design intern, promoted to lead the design department

- Designed and shipped the TavCorp store: catalogue, cart, checkout and payment pages, live in production.
- Designed the customer dashboard, sign-in flow and every page of the company website.
- Led the design department — set direction, reviewed work and mentored designers.
- Built the Brisk Hauling & Logistics brand identity end to end: mark, lockups, palette and written guidelines.

Head of Product Design & Template UI/UX

Sept 2024 – Jul 2025

SmartbloksAI · Lagos

Joined as designer, promoted to head of two design functions

- Designed the page-builder product: three-panel editor, widget library, live canvas and the Content/Style settings system covering every widget.
- Built a reusable control vocabulary — theme/custom/gradient colour pickers, spacing toggles, per-element show-hide switches — so one widget covers a dozen layouts.
- Cut full-template production time from roughly six hours to under two through the design system behind it.
- Designed 1,000+ blocks and 100+ templates across SaaS, e-commerce, health, property, legal, hospitality and nonprofit sectors.
- Designed Smartbillr, the company's AI invoicing product, across six connected screens.

Web & UI Designer

Jun 2023 – Sept 2024

Ideastosite (ITS) · Lagos

- Produced roughly 85% of the studio's published design output: logos, brand identity, website templates and social content.
- Designed and built benoitlondon.com, a WooCommerce store with catalogue, cart, accounts, an affiliate programme and wholesale sign-up.
- Designed and built teckafrica.org — fourteen pages for a children's tech-education charity.
- Also delivered tiagababy.com, cutesaint.com and americanelectrical.com.

Frontend Developer (UI/UX focus)

Apr 2022 – May 2023

AltSchool Africa · Lagos

- Built and maintained responsive, cross-browser interfaces in React.js, Vue.js, HTML5, CSS3 and JavaScript.
- Worked on performance optimisation, bug fixing and integrating frontend components into larger systems.

Frontend Developer Intern

Sept 2021 – Mar 2022

HNG Internship · Lagos

- Rebuilt a responsive Vue.js single-page application; the redesign contributed to a 40% increase in sign-ups.
- Documented style guidelines to keep design consistent across the team.

Digital Technology Instructor

Aug – Sept 2024

Abridged Summer School · Lagos

- Taught HTML, CSS and JavaScript to children over a summer programme, each student shipping their own site.

SKILLS

Design

Figma · Adobe XD · design systems · wireframing · prototyping · usability testing · brand & logo design · Illustrator · Photoshop · InDesign · Canva

Development

React.js · Vue.js · JavaScript (ES6+) · HTML5 · CSS3 · WordPress · Elementor · WooCommerce · REST APIs · Git · familiar with TypeScript

EDUCATION & CERTIFICATIONS

Diploma in Frontend Engineering — AltSchool Africa, October 2023

1st Place, WriteTech Bootcamp — Zaycodes (technical writing)

Introduction to Figma; Everyday UX Flows — Uxcel

Responsive Web Design; Frontend Development — freeCodeCamp

Secondary School Certificate — Divinity Comprehensive College, 2017

WRITING

Seven published articles on Medium, mostly React engineering — rendering behaviour, performance optimisation, API integration and the Context API — plus pieces on design systems and career progression.
